Scope

Digestive Health, Immunity, and Probiotics: U.S. Market Analysis and Opportunities aims to understand the market for digestive health products including probiotics (including prebiotic/probiotic combination products), digestive enzymes, and probiotic beverages. The report analyzes the market for digestive health and immunity, how large the market is, how fast it is growing, what the most important retail channels are, and sales and growth of major competitors in this space. This report focuses on both mass and specialty brands, as well as refrigerated products through all retail channels in the United States. This study focuses on products that are marketed for digestive immunity and health and includes:

- Digestive enzymes
- Probiotics
- Probiotic beverages

Digestive products covered in this study encompass a wide array of product forms and include tablets/caplets, capsules, sachets, drinks, tea, and juices. Foods that include probiotic additives and ingredients like yogurt are excluded.

Key Benefits

This study provides subscribers with accurate and current information and insights on the large and quickly growing digestive health and immunity market, profiles of major competitors in this market, and extensive research to understand the market's size and how fast it is growing, as well as the retail landscape for these brands. Specifically, this report is designed to provide subscribers with a comprehensive assessment of the following:

- An understanding of the size of the leading brands and companies
- Learn about product claims and ingredients
- Gain insights on key trends, growth rates, and new products
- Understand the retail environment and the most important channels in this market
- Forecast sales and market share expectations for these products in the future
- Companies in this market, and brands that are potential acquisition targets

Methodology

Kline’s approach places principal emphasis on primary research techniques to ensure that the foundation of business intelligence and insight is accurate, current, and reliable. Building on our 50-plus years in the business and leveraging our worldwide network of offices, our teams of seasoned professionals draw upon pragmatic industrial and commercial experience to understand and interpret global impacts and local perspectives.

Primary Research

We Know Who to Talk to. We Know How to Listen.

A high number of in-depth discussions are conducted by each analyst. All interviews are done with true industry insiders.

Kline’s analysts draw upon pragmatic experience to understand global impacts and local perspectives. Our interviews engage experts across all pertinent fields and sectors including:

- Marketers
- Retailers
- Trade associations and trade press

Secondary Research

We Know Where to Look – Mining the Details.

Analysis is further supplemented by secondary research, consisting of constant tracking of relevant websites, annual company reports, national statistics bureaus, trade/industrial/professional associations, and the like.

Relevant developments are diligently followed and their impact closely monitored. Reports also draw upon non-confidential data from Kline’s internal database, consisting of over half a century’s syndicated research.

Comprehensive Market Intelligence

We Know How to Verify.

Data are rigorously analyzed, cross-checked, distilled, and validated. Kline’s proven methodology allows exceptionally effective, precise, and reliable market

intelligence, giving subscribers a solid foundation on which to grow, refine, and expand their business with confidence.
